

TRANSMISSION & DISTRIBUTION LINE ENGINEER

Introduction

Clean Energy Consulting (CEC) is a well-established BC company with offices in BC and the Yukon, dedicated to building outstanding projects. With involvement at all stages of project development, we strive to better understand and fully accomplish the desired project outcomes for our clients. Our self-directed, hands-on team enjoys the opportunity to be involved from the concept through to operation. This allows our team to learn and improve while providing ongoing challenges and opportunities for development.

Summary

CEC is currently looking for a **Transmission & Distribution Line (T&D) Engineer** to join the team. This position will be primarily focused on providing T&D engineering services to our clients in the Renewable Energy, Utility, and Mining sectors. The ideal candidate will be a graduate of an accredited engineering program, optional experience in T&D design would be beneficial. They should have a robust understanding of engineering principles, and a willingness to learn transmission and distribution engineering design practices through diverse and challenging projects. They should also be striving to increase their knowledge in technical and business systems.

Duties and Responsibilities

- Provide T&D engineering and design services
- Assist senior personnel in the provision of T&D engineering services by connecting with clients, preparing proposals, etc.
- Prepare design drawings, specifications, spreadsheets, and design calculations
- Prepare construction work packages
- Meet with clients to discuss their projects
- Interface with clients, contractors, and vendors as required for various tasks
- Some travel to project sites will be required
- Engage in business development activities and contribute to growing the company

Qualifications

- Possess a civil, mechanical, or similar engineering degree from a recognized post-secondary institution
- Registered or eligible for registration with EGBC (as an EIT or P.Eng.)

Required Skills and Experience

- Have a general understanding of the electrical principles associated with high voltage T&D lines and power systems
- Ability to produce high-quality technical documents such as design basis documents, reports, and specifications
- Great communication and interpersonal skills, a high level of initiative, a strong work ethic, and the ability to be coached
- Direct T&D line design experience is preferred
- Familiarity with overhead line design principles, such as the basic structural and mechanical engineering principles related to these installations
- Knowledge of and ability to use PLS-CADD, PLS-POLE and/or PLS-TOWER would be an asset
- Experience in producing engineering design drawings/documents
- Has a strong foundation in statics, able to conceptualize and analyze structural forces, reactions, and deflections

Salary Range: \$65,000 - \$85,000 per year. Final offer will depend on qualifications and experience.

This person will report to the CEC Power Delivery Team Lead. Our team is based in Vancouver, BC. Our office building features brand new amenities including a state-of-the-art fitness facility, sky-view rooftop deck, secure bike room, and access to the Canada Line and Pacific Centre. CEC offers a professional and engaging working environment with competitive compensation and benefits packages.

Please forward your resume and cover letter in PDF format by email to: careers@cleanenergyconsulting.ca. We thank all applicants for submitting their resumes; however, only applicants who are being considered will be contacted.
