

TRANSMISSION & DISTRIBUTION LINE TEAM LEAD

Introduction

Clean Energy Consulting (CEC) is a well-established BC company with offices in BC and the Yukon, dedicated to building outstanding projects. With involvement at all stages of project development, we strive to better understand and fully accomplish the desired project outcomes for our clients. Our self-directed, hands-on team enjoys the opportunity to be involved from the concept through to operation. This allows our team to learn and improve while providing ongoing challenges and opportunities for development.

Summary

CEC is currently looking for a **Transmission & Distribution Line Team Lead** to join the team. This position will be primarily focused on providing transmission and distribution line (T&D) engineering services to our clients in the Renewable Energy, Utility, and Mining sectors. This person will be responsible for actively developing and growing the Transmission & Distribution Line Team. The ideal candidate will be a graduate of an accredited engineering program and have extensive experience in T&D design. The candidate should be an innovative and practical engineer who enjoys tackling new and diverse projects. They should also be striving to increase their knowledge in technical and business systems.

We want someone who is passionate about what we do, willing to learn, and who wants the challenge of building a team.

Duties and Responsibilities:

- Develop and execute a vision for the Transmission & Distribution Line Team.
- Management and Leadership:
 - Manage the day-to-day activities of the Transmission & Distribution Line Team
 - Mentor and coach team members (local and remote)
 - Be accountable for the overall performance of the Transmission & Distribution Line Team
 - Act as Project Manager on most Transmission & Distribution Line Team projects
 - Grow leadership skills
- Business Development:
 - Responsible for business development for the team
 - Prepare and lead T&D and multi-discipline proposals
 - Contribute to the growth of the company
- Technical
 - Provide T&D engineering services
 - Prepare and review design drawings, spreadsheets, design calculations, and construction work packages
 - Meet with clients to discuss their projects
 - Some travel to project sites will be required

Qualifications:

- Possess a civil, mechanical, or similar engineering degree from a recognized post-secondary institution
- 10 years of relevant experience in T&D line engineering and project management
- Proven experience leading, supervising, and mentoring other T&D Engineers and Technicians
- Registered or eligible for registration with EGBC

Required Skills and Experience:

- Great communication and interpersonal skills, a high level of initiative, a strong work ethic, and the ability to be coached
- Experience in Business Development and the drive to continue to develop their skills in this area
- Excellent understanding of, and ability to implement, overhead line design principles
- Highly proficient in PLS-CADD and PLS-POLE; knowledge of PLS-TOWER would be an asset
- General understanding of the electrical principles associated with high voltage T&D lines and power systems
- Proven track record in producing and reviewing high-quality technical documents such as design basis documents, reports, and specifications

This person will report to the Director of Engineering. Our team is based in Vancouver, BC, but we are open to the possibility of remote work. CEC offers a professional and engaging working environment with competitive compensation and benefits packages.
